

Get original music from me: <https://www.fiverr.com/share/3ANgBA>

The music available in this package can be used in any kind of project, commercial or not. It includes music tracks and musical sound effects that cover the most common requirements of RPG and action adventure games.

Most of the musical tracks have loop points, so it is very easy to make the music loop forever in your game. File names ending with "NL" don't have loop points, either because they are musical sound effects designed to be played once, from beginning to end, or because they are musical tracks that were not composed with looping in mind. Activate the loop button in the inspector and play the file if you want to test the loop points.

All the tracks are stereo, are presented in the .wav format and have a sample rate of 44.100 kHz and 16 Bit resolution. The loops are seamless and noise-free. Please understand that, depending on your target platform and a few other factors, audio files might be converted at some point during your development, which might introduce noise at the moment of looping in the final product.

* Version 1.5 includes many newer tracks of higher quality. The older, outdated music tracks and sound effects are now in the sub-folder named «Outdated tracks». I hope you like the newer tracks, those are more recent compositions and better represent my current skills. Music tracks have «BGM» in the name and musical sound effects have «MS» in the name. Outdated tracks have «OLD» in the name.

The following is a list of the files and a brief description:

BGM01hero	Heroic orchestral track, good as a main theme.
BGM02evil	Dark orchestral track, good as a villain's main theme or a dungeon.
